10	*223	*224	*225
11	*225	*226	*226

All fall and spring targets (unless otherwise noted) are based upon cut scores from the 2008 TIES alignment study with MN standards, meaning it is the minimum score necessary to have an 90% chance of obtaining a “Meets Standards” rating on the MCA in that area. The winter targets in these cases are halfway between the aligned fall and spring targets.

*Targets are based upon the median score from NWEA’s 2008 normative sample
