

Examples of Personal Care Language (Statements)

Personal Care Services

The following personal care assistant services (paraprofessional) will be provided: Activities of Daily Living (ADL) - mobility, transfers, and positioning.

The following personal care assistant services (paraprofessional) will be provided: Health Related Procedures - range of motion, assisting with self-administered medication.

The following personal care assistant services (paraprofessional) will be provided: Intervention and redirection of behavior that interferes with completion of an Activity or Activities of Daily Living.

Or use statements similar to the following, which also includes supervision information:

A paraprofessional will meet Sharon's personal care needs by assisting Sharon with ADL's including mobility, transfers, and positioning. These activities will be supervised by a RN.

Appropriate staff will meet George's personal care needs by assisting George with ADLs including toileting, mobility, and health related procedures including medications and ROM. These activities will be supervised by an RN.

Appropriate staff will meet Jeannie's personal care needs by observation and redirection of self injurious behavior throughout the school day, and during transportation to-and-from school on the bus. This activity will be supervised by a mental health professional.

A paraprofessional will meet Jerry's personal care needs by prompting and cuing Jerry to complete all ADLs including eating, grooming, and toileting and will cue Jerry throughout the day. The activities will be supervised by an RN.

Special Transportation definition

"Child/student has a physical or mental impairment that keeps them from safely accessing and using common carrier transportation, such as a bus, taxi cab, private automobile or other common carrier."

Need for special transportation must be included in IEP/IFSP/IIP and must state "**special transportation**".

Child/student is transported to and receives another MHCP covered IEP service on the day transported.

Child/student requires a special adaptation to the bus such as a wheelchair lift, special harness, safety vest or special car seat (not a regular car seat or seat belt) or a one-on-one aide.
